Anti-forgery printed material e.g. for policy documents - has
diffraction patterns formed by (semi)transparent holograms or
diffraction gratings

DAINIPPON PRINTING CO LTD 03.01.12 03JP-020843

G05 (04.07.20) B42D 15/10, B41M 3/14, G03H 1/18, G06K 18/06,
10/10

Printed material has (A) first information layer and (B) second
information layer on a substrate, and (C) first diffraction pattern
comprising transparent or semitransparent hologram or diffraction
grating on or under the certain area of the first information layer,
and (D) second diffraction pattern comprising transparent or
semitransparent hologram or diffraction grating on or under the
certain area of the second information layer. The diffraction
directions of the first and second diffraction patterns are different.

Anti-forgery method is effected using the printed material so that
it cannot be copied correctly.

USE/ADVANTAGE - The printed material is used for coupon,
policy certificate, etc. The material cannot be copied correctly. If it
is copied by copy machine, it forms different image from the visual
image. (7pp Dwg.No.0/7)
